REPORT NO.

THIS IS UNEVALUATED INFORMATION

25X1

1. The Rozbark mine in Bytom (Benthon) has three shafts currently in operation. The deepest shaft is 640 meters. This mine operates on a 24-hour day basis, seven days a week. The three daily shifts run from 0600 to 1400, 1400 to 2200, and 2200 to 0600. The entire mine employs 1,200 civilians and 800 soldiers per shift. Some of the soldiers are members of a penal group while others are enlisted men assigned to duty at the mine. The soldiers are utilized in administrative duties and in mine work below ground.
2. The daily output of the "Rozbark" mine is between 4,000 and 6,000 tons of coal. When the daily production drops below 4,000 tons, an investigation is carried out to determine whether economic sabotage is involved. All the coal produced from this mine is shipped to Gdynia for further transport to East Germany or to Russia.
3. In October 1953, a convoy of Chinese laborers arrived in Bytom for labor assignments in the mines. Approximately 200 Chinese took a physical examination in Bytom on 20 October 1953.
